PROFESSIONAL SUMMARY

QA / Test Automation Engineer with **2+** years of experience in delivering high-quality software through automation and manual testing across UI, API, and system integration layers. Proven ability to reduce manual effort and improve test efficiency through **automation frameworks**. Experienced in Agile environments with strong problem-solving skills, defect analysis, and **CI/CD** integration. Passionate about improving quality engineering practices and leveraging automation to drive efficiency.

TECHNICAL SKILLS

Automation & Programming: Java, Selenium WebDriver, TestNG

Testing: Functional, Integration, Regression, End-to-End, Exploratory, UAT, Smoke, System Testing, REST API Testing, Data Validation, Cross-Browser Testing, UI Testing, Automation Testing, Agile, Scrum, SDLC, STLC.

Tools & Platforms: Jenkins, Maven, Git, JIRA, TestRail, Confluence, GitHub Copilot, Postman, SQL, CI/CD.

PROFESSIONAL EXPERIENCE

TargetBay

Chennai, India

Test Engineer

Nov 2023 – Aug 2024

- Developed and maintained automation scripts for **smoke and regression test suites**, reducing manual effort by **~40–50%**
- Automated repetitive regression flows, saving **~8–10 hours per sprint** in execution time.
- Improved test coverage and reduced defect leakage by enhancing automation scenarios across key workflows
- Designed and executed test cases from business requirements, ensuring **traceability and complete validation**
- Performed manual and automated **functional, integration, and regression testing** across releases.
- Identified, logged, and tracked defects in Jira, ensuring resolution within sprint timelines
- Validated APIs and backend systems using **Postman and SQL** to ensure data integrity
- Integrated automated test suites into **CI/CD pipelines (Jenkins)** for continuous testing
- Leveraged **GitHub Copilot** to accelerate script development, generate reusable test methods, and improve coding efficiency in automation framework
- Implemented **TestNG Listeners**, retry mechanisms, and reporting tools (**Extent Reports, Allure**) to enhance reporting and failure analysis, while proactively identifying risks and dependencies to improve product quality

Amazon Development Centre

Chennai, India

Quality Service Associate

Sep 2022 – Nov 2023

- Developed and executed automation scripts to support regression testing, reducing manual effort by **~25–30%**
- Improved regression execution efficiency, saving **~5–6 hours per testing cycle**
- Performed **integration, API, and system testing** across distributed cloud-based systems
- Wrote and maintained **basic automation scripts and test utilities** to support repeated validation scenarios
- Validated application workflows using structured test cases derived from functional requirements
- Analysed defects and performed **root cause analysis**, reducing issue resolution time by **~20%**
- Participated in Agile ceremonies and collaborated with cross-functional teams to deliver quality releases
- Supported tracking of **issues, risks, and dependencies**, ensuring smooth testing cycles

PROJECT

- Built a **Selenium-TestNG automation framework using POM**, automating key smoke and regression flows
- Implemented industry practices such as **data-driven testing, CI/CD (Jenkins), reporting, and retry logic** to enhance framework reliability
- Focused on creating a **scalable and reusable framework aligned with real-world QA processes**

EDUCATION

MBA – Cloud Computing (2026) – Dublin Business School | Grade : 2:1

(Dublin, Ireland)

- Dissertation on AI-driven QA improving test efficiency, defect detection, and CI/CD automation.

MSc Computer Science – Bishop Heber College | Grade : 8.01CGPA

(Trichy, India)

B.Voc Information Technology – Bishop Heber College | Grade : 7.91CGPA

(Trichy, India)

ACHIEVEMENTS

- Targetbay (2024) Shining Star Award** – Recognised for strong contribution to quality assurance, defect detection, and improving testing processes.
