Professional Summary

QA / Test Engineer with 2+ years of experience in designing and executing automated and manual tests across UI, API, and system integration layers in Agile environments. Strong expertise in Java, Selenium WebDriver, TestNG, API testing, and SQL validation. Experienced in building automation frameworks, executing regression suites, and integrating tests into CI/CD pipelines. Skilled in analysing test results, debugging failures, and delivering high-quality, reliable software. Passionate about improving automation infrastructure and test efficiency.

Technical Skills

Automation & Programming: Java, Selenium WebDriver, TestNG

Testing Types: Functional Testing, Integration Testing, Regression Testing, End-to-End Testing

API & Data: REST API Testing (Postman), SQL

Tools & Platforms: Jenkins, Maven, Git, JIRA, TestRail, Confluence, GitHub Copilot

Methodologies: Agile / Scrum, SDLC, CI/CD

Professional Experience

Targetbay, India | Test Engineer | Nov 2023 – Aug 2024

- Developed and maintained automation test scripts using Java, Selenium WebDriver, and TestNG for functional and regression testing
- Created test cases from business requirements and functional specifications, ensuring complete test coverage
- Executed manual and automated functional, integration, and regression tests across releases
- Maintained reusable test script libraries and improved test coverage across key workflows
- Validated APIs and backend systems using Postman and SQL to ensure data integrity
- Analysed automation results, logged defects in Jira, and collaborated with developers to resolve issues
- Integrated automated tests into CI/CD pipelines (Jenkins) for continuous testing
- Contributed to improving QA processes and identifying opportunities for automation

Amazon Development Centre, India | Quality Service Associate : Sep 2022 – Nov 2023

- Developed and executed automation scripts to support regression testing
- Performed **integration and API testing** across distributed cloud-based systems
- Analysed test failures and improved automation stability within CI pipelines
- Participated in Agile ceremonies including stand-ups, sprint planning, and retrospectives
- Collaborated with cross-functional teams to ensure quality delivery

Additional Strengths

- Strong problem-solving skills with ability to analyse complex issues quickly
- Experience translating business requirements into test scenarios
- Ability to work in fast-paced Agile environments with multiple priorities
- Interest in exploring AI-driven testing approaches and automation improvements

Education

MBA – Cloud Computing (2026) – Dublin Business School

MSc Computer Science – Bishop Heber College

B.Voc Information Technology – Bishop Heber College
