Professional Summary

QA / Test Automation Engineer with 2+ years of experience in delivering high-quality software through automation and manual testing across UI, API, and system integration layers. Proven ability to reduce manual effort and improve test efficiency through automation frameworks. Experienced in Agile environments with strong problem-solving skills, defect analysis, and CI/CD integration. Passionate about improving quality engineering practices and leveraging automation to drive efficiency.

Technical Skills

Automation & Programming: Java, Selenium WebDriver, TestNG

Testing: Functional, Integration, Regression, End-to-End, Exploratory Testing

API & Data: Postman, REST API Testing, SQL

Tools: Jenkins, Maven, Git, JIRA, TestRail, Confluence, GitHub Copilot

Methodologies: Agile, Scrum, SDLC, CI/CD

Professional Experience

TargetBay | Chennai, India | Test Engineer

Nov 2023 – Aug 2024

- Developed and maintained **automation scripts for smoke and regression test suites**, reducing manual testing effort by ~40–50% and Automated repetitive regression flows, saving ~8–10 hours per sprint in execution time
- Improved test coverage and reduced defect leakage by enhancing automation scenarios across key workflows. Designed and executed **test cases from business requirements**, ensuring traceability and complete validation.
- Performed manual and automated **functional, integration, and regression testing** across releases
- Identified, logged, and tracked defects in Jira, ensuring resolution and retesting within sprint timelines
- Validated APIs and backend systems using Postman and SQL to ensure **data integrity and system reliability**, Integrated automated test suites into **CI/CD pipelines (Jenkins)** for continuous testing
- Identified project risks and dependencies, proactively contributing to improved product quality

Amazon Development Centre, India / Quality Service Associate

Sep 2022 – Nov 2023

- Developed and executed automation scripts to support regression testing, reducing manual effort by ~25–30%
- Improved regression execution efficiency, saving ~5–6 hours per testing cycle
- Performed **integration and API testing** across distributed cloud-based systems
- Analysed defects and performed **root cause analysis**, reducing issue resolution time by ~20%
- Participated in Agile ceremonies and collaborated with cross-functional teams to deliver quality releases
- Supported tracking of issues, risks, and dependencies across multiple testing cycles

Project

- Built a **Selenium-TestNG automation framework using POM**, automating key smoke and regression flows
- Implemented industry practices such as **data-driven testing, CI/CD (Jenkins), reporting, and retry logic** to enhance framework reliability
- Focused on creating a **scalable and reusable framework aligned with real-world QA processes**

Education

MBA – Cloud Computing (2026) – Dublin Business School | Grade : 2:1

(Dublin, Ireland)

- Dissertation on AI-driven QA improving test efficiency, defect detection, and CI/CD automation.

MSc Computer Science – Bishop Heber College | Grade : 8.01CGPA

(Trichy, India)

B.Voc Information Technology – Bishop Heber College | Grade : 7.91CGPA

(Trichy, India)

ACHIEVEMENTS

- Targetbay (2024) Shining Star Award** – Recognised for strong contribution to quality assurance, defect detection, and improving testing processes.
- Activities and societies:** Secretary of the computer science department
