Professional Summary:

QA Automation Engineer with 2+ years of experience validating web applications across UI, API, backend, and system integration layers within Agile environments. Skilled in developing automation solutions using Java, Selenium WebDriver, and TestNG, and integrating automated tests into CI/CD pipelines using Jenkins. Experienced in debugging automation failures, validating backend services, and collaborating closely with cross-functional teams to deliver reliable software releases.

EXPERIENCE:

Test Engineer — BayRewards Shopify Application

TargetBay, Chennai | Nov 2023 – Aug 2024

- Strengthened release stability by leading end-to-end testing across functional, integration, and regression scenarios for a production e-commerce platform.
- Expanded automated test coverage by developing UI automation scripts using Java, Selenium WebDriver, and TestNG, reducing reliance on repetitive manual regression testing.
- Prevented recurring production defects by maintaining a structured log of critical issues and re-validating them during each build regression cycle.
- Validated backend integrations by performing API testing and verifying system data flows during system-level testing.
- Partnered with developers and product teams to diagnose defects, enhance test coverage, and ensure high-quality production releases.

Quality Service Associate — AWS WorkSpaces

Amazon Development Centre, Chennai | Sep 2022 – Nov 2023

- Automated regression workflows using Java, Selenium WebDriver, and TestNG to support continuous testing of cloud-based applications.
- Enhanced platform reliability by executing integration and API validation testing across distributed system components.
- Stabilized CI test pipelines by investigating automation failures and improving test reliability within Jenkins builds.
- Contributed to Agile development cycles by participating in sprint planning, backlog refinement, and quality discussions.

EDUCATION

MBA – Cloud Computing (2026)

Dublin Business School, Ireland

MSc Computer Science (2021)

Bishop Heber College, India

B.Voc Information Technology (2019)

Bishop Heber College, India

SKILLS

Automation: Java, Selenium
WebDriver, TestNG

Testing: Functional Testing,
Integration Testing, Regression
Testing, End-to-End Testing

API & Data: REST API Testing
(Postman), SQL Data Validation

Tools: Jenkins, Maven, Git,
JIRA, TestRail

Methodologies: Agile / Scrum,
CI/CD, Test Strategy
Development

AWARDS

Shining Star Award – Q1

(Jan–Mar 2024) TargetBay

Awarded for outstanding
contributions to quality assurance
efforts, demonstrating strong
ownership in defect detection,
test execution, and supporting
reliable product releases.

PROJECTS

- Developed a scalable UI automation framework using Java, Selenium WebDriver, and TestNG to streamline regression testing.
- Integrated automated test execution with Jenkins CI/CD pipelines to enable continuous testing during development builds.
- Improved automation stability by implementing retry mechanisms, custom listeners, and structured reporting.
