Professional Summary

QA / Test Engineer with 2+ years of experience in manual and automation testing across UI, API, and system integration layers in Agile environments. Strong expertise in Java, Selenium WebDriver, TestNG, and API testing, with exposure to CI/CD pipelines and test automation frameworks. Experienced in analysing requirements, executing test cases, tracking defects, and ensuring quality delivery. Skilled in problem-solving, risk identification, and maintaining traceability between requirements and test cases. Passionate about improving quality engineering practices and continuously learning emerging technologies.

Technical Skills

Automation & Programming: Java, Selenium WebDriver, TestNG

Testing Types: Functional Testing, Integration Testing, Regression Testing, End-to-End Testing, Basic understanding of Non-Functional Testing (Performance, Load, and Reliability), Defect Management, Test Case Design

API & Data: REST API Testing (Postman), SQL

Tools & Platforms: Jenkins, Maven, Git, JIRA, TestRail, Confluence, GitHub Copilot

Methodologies: Agile / Scrum, SDLC, CI/CD

Professional Experience

TargetBay, India | Test Engineer | Nov 2023 – Aug 2024

- Developed and maintained automation test scripts using Java, Selenium WebDriver, and TestNG
- Improved test coverage and reduced regression effort through automation enhancements
- Created test cases from business and functional requirements, ensuring traceability
- Executed manual and automated functional, integration, and regression testing
- Identified defects, logged issues in Jira, and tracked them through to resolution
- Validated APIs and backend systems using Postman and SQL
- Integrated automated tests into CI/CD pipelines (Jenkins)
- Contributed to identifying risks, dependencies, and quality issues during project execution
- Maintained test documentation and reported test execution metrics and results

Amazon Development Centre, India | Quality Service Associate : Sep 2022 – Nov 2023

- Developed and executed test scripts to support regression testing
- Performed **integration and API testing** across distributed systems
- Analysed defects and performed **root cause analysis** to support issue resolution
- Participated in Agile ceremonies including stand-ups, sprint planning, and retrospectives
- Collaborated with cross-functional teams to ensure quality delivery
- Supported tracking of issues, risks, and dependencies across testing cycles

Additional Strengths

- Strong problem-solving skills with ability to analyse and resolve complex issues
- Ability to own and track defects/issues through to resolution
- Experience translating requirements into structured test scenarios
- Good understanding of traceability between requirements and test cases
- Self-motivated, adaptable, and able to work independently
- Strong communication skills with ability to collaborate across teams

Education

MBA – Cloud Computing (2026) – Dublin Business School (Ireland)

MSc Computer Science – Bishop Heber College (India)

B.Voc Information Technology – Bishop Heber College (India)
